Terms and Conditions

Invoice terms are Net 30 Days with prior credit approval. Visa, MasterCard, Discover, and American Express are accepted. Amounts unpaid after 30 days shall be assessed a finance charge of 2% per month. Orders received from past due accounts will be processed on COD terms until the account becomes current. We reserve the right to require a deposit on an order when necessary.

We prefer that orders for street name signs and non-standard signs be typed or printed clearly and e-mailed or faxed to us in order to eliminate errors.

Shipping Options

Our Delivery
Shannon-Baum Signs delivers! We have several delivery vehicles to accommodate your orders.

Standard Shipping
Orders will be shipped via "best way" unless otherwise specified. Current published rates plus handling charges will be added to your invoice.

Express Shipping
Next-Day and 2-Day services are available (additional fees apply).

C.O.D
Check or Money Order are acceptable.

Drop Shipments
Shipments to one or more locations can be arranged at the time you place your order.

Upon Receipt of Your Order
Please check all goods carefully. To return merchandise, call our customer service department. Except as otherwise noted, no material will be accepted for return 30 days from date of shipment. Any claims or discrepancies in shipment must be made within one week of receipt of merchandise.

Color Choices & Proofs

We use industry standard reflective and vinyl colors. We can match PMS colors for an additional charge.

We will provide a proof of your sign upon request, once your order has been placed. However, requesting a proof may extend the total production time, and could incur a design fee.

Choosing the Perfect Type

We will set your copy free of charge in any of our many standard typestyles some of which are shown below. We can also attempt to match the typestyle of your sample to the hundreds in our library.

Accessing our FTP Site

Go to our website at www.shannonbaum.com and click on "File Upload". After this you will be prompted to enter in your name, company name, phone number, and email address. Enter this information and click submit. You will then be presented with an app that contains the options to add, remove, and upload files (you must have Java installed to view the app). Add the files that you want to upload, then click "Upload". The file(s) should now be uploaded to us, and you will receive a notification when the file(s) is finished uploading. If assistance is needed in using our FTP site or saving or sending art, please contact customer service.

Requirements for Artwork Submitted

As with most graphic reproduction systems, the quality of the original artwork is crucial to the quality of the finished product.

Art must be submitted in one of the following filetypes:
- .EPS
- .DXF
- .AI

These formats are acceptable as long as the art is in line/point/arc format (Vector Art). Some programs create double lines when file conversions are performed. These double lines usually require more clean up.

Art representation (computer printout) of the file must be included for comparison. This will help us determine whether the art is correct and has not been changed while being imported into our design program.

- Corel Draw users: When exporting files from Corel Draw, first remove outlines from your artwork. When outlines are left on and exported into .EPS format, they become multiple contours (one contour for the inside of the outline and one for the outside). Failure to remove outlines before exporting may result in increased clean up time and artwork that does not match the original.

- Text must be converted to curves before exporting files. Files not converted to curves may default to another font when imported into our design program resulting in incorrect artwork being produced.

In-Street Pedestrian Sign System

The In-street pedestrian system offers the promise of a safer walk to and from school for thousands of children. All of these devices use the color Fluorescent Yellow Green, which is recognized by leading scientists as being quickly picked up by your eyes. This color is so effective that it is restricted by the federal government for pedestrian applications only. Now any time a driver sees this color, they know to be alert for pedestrians - especially children - who are in the roadway. Choose the product that fits your need: Maryland requires the stop (R1-6A), while Delaware requires the yield (R1-6).

STATE LAW YIELD TO WITHIN CROSSWALK

We also offer a complete selection of standard and custom die cut letters, numbers, cut out arrows, radius corners, and border tape.

Emergency Vehicle Decals

Shannon-Baum Signs, Inc. is known industry wide for the quality of our reflective decals. We have manufactured decals for police departments, fire departments, and county/state vehicles. We have a state-of-the art graphics department which enables us infinite design capabilities. We can help your department design a new decal or work off of an existing design. Screen printed and digitally printed decals are available.

Shannon-Baum Signs provides nothing but the finest output in order to reach the targets that our customers have set. Various types of businesses have trusted us through the years when it comes to delivering exceptional vehicle graphics.

Vehicle Wraps

Vehicle wraps put your company's name where people are. Large format printing produces vinyl car graphics that are eye catching and attractive. Best of all, the visual effect is mobile. Travel time becomes marketing time. When calling on clients or performing a service on site, parking in a conspicuous area puts your company's name in the view of passersby.

Call 410.781.4000 • Toll Free 1.800.368.2295 • Fax 410.781.4673 • www.shannonbaum.com

Still the best way to grab your audience's attention are L.E.D. signs. Displaying specials, events, and information, L.E.D. sign owners are taking advantage of changing their messages.

Sandblasted Signs

Thanks to new techniques, enhanced technology, and increased choice of materials, Sandblasted signs can work almost anywhere today. They can be used as entrance signs, park signs, store signs, company logos, address plaques, and more. Each is unique and custom made by hand.

ADA Braille Signs

Each sign is made of durable clear plastic carefully printed on the back surface to fully protect the message from marring. These custom - quality signs feature internationally recognized symbols, radius corners and stepped edging. A rich appearance to add a professional touch to any building. A permanent, pressure sensitive adhesive backing makes signage easy to mount on almost any surface instantly. No tools are necessary. Custom braille signs are also available in a variety of colors, sizes, and designs.

MDI Windmaster Sign Stands

WindMaster Sign Stands have been engineered using the highest quality components and thoroughly tested to ensure exceptional performance. The bases are equipped with springs that have strong initial tension to resist twisting and turning of signs in high wind gusts. The aircraft aluminum legs have kick-release buttons to simplify set-up and take-down and rubber caps for traction. Each leg is adjustable for stability on curbs or uneven terrain. They are available in a variety of heights.

Traffic Delineation & Road Markings

Curv-Flex Posts
The Curv-Flex is recommended for areas where vehicle impacts are likely. With its trademarked curve and flange profile, the Curv-Flex marker withstands direct tire impacts.

Super Duck
This unique 3" channelizer supports up to 6 bands of reflective sheeting. It's ideal for construction sites, lane changes, and added visibility to raised medians.

Roadmarker
The Roadmarker remains the most popular marker in the market. Two ribs on the side protect sheeting from vehicle impacts while the back rib gives added strength for driving into hard soil conditions.

Traffic Paint
White or yellow latex paint for marking asphalt or concrete. Available in 5 gallon containers. Glass beads are also available.

Stencils & Thermoplastic Markings

We provide 1/16 polyvinyl reusable stencils. We have various sizes of copy and symbols. Contact us for more information.

Ennis-Flint Thermoplastic pavement marking material is an environmentally and user-safe compound containing binder, pigments, filler and glass beads. Thermoplastic is a durable and cost effective marking system that can be installed as a flat line with various glass bead packages.

Our easy to handle one-man post driver is 65" long which permits one man to drive a U-channel, square, or round post up to 12'0" from ground level. The barrel I.D. is 3 3/4", weight is 38 lbs. We also carry a lightweight post driver for delineator posts, and a heavy duty driver for 3lb and 4lb posts. Our drivers are also available with extended handles.

Drive Caps are available for U-Channels 2lb and 3lb posts

Standard Post Driver

Delineator Post Driver

Our hand-operated jack and handle pulls most types of posts. Handle is separate from base, and has two different leverage positions. The handle can also be used for straightening twisted channel posts. Use with detachable pullers. Pullers pull U-channel, square, round and wood posts. Welded, hardened-steel jaws prevent slipping. Automatically adjust to any shape post. Use with the standard or heavy-duty jack and handles. An optional heavy duty puller is available for larger posts.

Rhino Brand post drivers (PD 50 and 55) are also available, please contact us for more information.

Band-it Stainless Steel Strapping

Band-It Ear-Lock Buckles
Band-It Buckles are designed to accommodate both single or double wrap clamps in metals and vary by width to correspond with Band-It Bands.

Package Quantity- 100

C25299- 1/4" Width
C25399- 3/8" Width
C25499- 1/2" Width
C25599- 5/8" Width
C25699- 3/4" Width

Valuclips
Valuclips are reinforced with angle ribs for extra strength. For use with Valustrap and Valustrap Plus. and Band-It Bands.

Package Quantity- 100

C15199- 3/16" Width
C15399- 3/8" Width
C15499- 1/2" Width
C15599- 5/8" Width
C15699- 3/4" Width

The Band-It Tool
A drop forged electroplated tool with tensioning capability of over 2,400 pounds. Used to apply Band-It Bands and Buckles, and Strapping

C00169- Band-It Tool
Replacement Parts:
C00689- Tension Handle and Screw Kit
C01899 - Band Gripper Kit Assembly
C01687 - Thrust Bearing
C05887 - Cutter bar and Handle Kit Assembly

Valustrap Plus
This Strapping is .020" thick and is used when medium strength is needed for pipe covering and traffic signs. Use with Valuclips

Package Quantity: 100' and 200' rolls

C19199- 3/8" 100' roll
C18189- 1/2" 100' roll
C17199- 5/8" 100' roll
C16189- 3/4" 100' roll
C19399- 3/8" 200' roll
C18389- 1/2" 200' roll
C17399- 5/8" 200' roll
C16389- 3/4" 200' roll

Band-It Band
Band-It Band is .020 to .030" thick in a range of widths, all stainless steel with a full round edge for larger signs. For extra strength, use a double wrap, threading the band through the buckle each time around. Order band and buckles of the same material and width,

Package Quantity: 100' rolls

C20299- .020"x1/4"
C20399- .025"x3/8"
C20499- .030"x1/2"
C20599- .030"x5/8"
C20699- .030"x3/4"

Sign Mounting Brack-Its
Band-It Sign mounting Brack-Its are used to mount traffic signs securely with Band-It Band and Buckles, Valustrap, Valustrap Plus or Free-End Clamps. These Brack-Its are reinforced with specially designed ribbing for extra strength, to withstand stress and wind vibration. The hex head bolts, with metal and fiber washer, require no nuts and are fully threaded to solidly anchor any sign.

Package Quantity: 50

D00189- Single bolt straight leg SS with SS bolt, washer and fiber washer
D00499- Single bolt straight leg SS Brack-It only
D02189- Single bolt flared leg SS Brack-It with SS bolt, washer and fiber washer.
D02299- Single bolt flared leg SS Brack-It only.

Scru-Seal Clamps With Band-It Band
A screwdriver is the only tool needed to tension these clamps. A 3/8" wide stainless steel band is used, single or double wrapped, cut as required from the 100' roll. Scru-Seal clamps with slotted hex can be used around objects as small as 2" diameter. Instructions for use are on the back side of the carton.

M21099- The complete package: 25 Scru-Seal racks, 25 housings, Valustrap band 3/8" x 0.015" x 100'
M21199- 10 Scru-Seals and 10 housings
M21199-25- 25 Scru-Seals and 25 housings
M21199-100- 100 Scru-Seals and 100 housings

Clamp-Pak
Make your own clamps, 2" to 38" in diameter, with the contents of this Clamp-Pak. Ten shrink-packed cards to a carton with a hang-hole at the top. Instructions are on the back side of the Clamp-Pak Card.

M21899- Clamp-Pak

BAND-IT®

Tufnut Security Bolts

Tufnut Steel Security Nuts are fastened with regular tools. Tufnut tamper proof nuts are fully adjustable, to give you complete control over how tightly your property is secured. A Tufnut is threaded onto a bolt, finger-tight. A second nut is installed upside-down. A wrench is inserted between the two nuts to tighten. Once fastened, the second nut is removed.Use the same procedure (reversed) to remove nuts for maintenance.

Corner Bolts

Aluminum Corner Bolts are used to attach square posts to bases.

Breakaway Nuts

Vandal guard Breakaway nuts come in 5/16". Upon tightening, the hex head shears off, leaving the conical nut base to protect your property.

Pop Rivets

Pop Rivets can be used where access to the back of the workpiece is not accessible. Simply insert the rivet into the tool, place the head of the rivet into a hole in the materials to be joined, and activate the tool: it will pull the mandrel head into the rivet body, expanding it, and forming a strong, tight, reliable joint on the back side of the application (forming the secondary clamp). At a predetermined setting force, the mandrel breaks leaving a tightly fastened joint.

Drive Rivets

Drive Rivets come in all sizes, and they are easy to install, requiring no special tools. The drive rivet is set by striking the pin with a hammer, driving the pin flush with the rivet head and expanding the back side of the rivet.

5/16"x 2" and 2 1/2" hex bolts, carriage bolts, and lag bolts are available. Metal washers as well as nylon washers for H.I.P and D/G signs are in stock.

Signfix

SIGNFIX Modular Sign Support Systems are recognized by sign fabricators as a quicker, easier and cost effective method to mount all sizes of signs to any size or shape of pole.
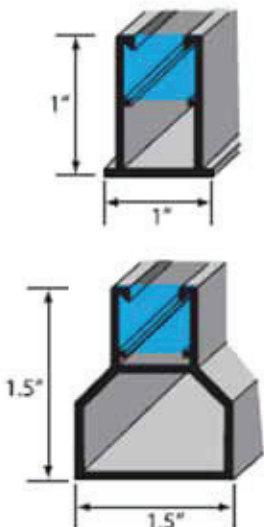

Channel Extrusions

Signfix channel extrusions are manufactured from 6061-T6 Aluminum alloy to provide excellent corrosion resistance and high strength structural properties. Each channel extrusion has the identical channel hardware configuration which allows the simple mix and match design for attaching hardware to round poles, square posts, andI-beam structures.

Mast Arm Mount Hardware Kits

These kits create a strong, maintenance-free frame for mounting sign blanks to mast arms. Aluminum extrusions and stainless steel corner angles, braces, and clamps give maximum support to the sign. This prevents loss of reflectivity from wind or vibration. No field assembly is required, and clamps may be easily adjusted to match the angle of the mast arm.

Aluminum Blanks

We stock .040, .063 (12"x18" only), and .080 aluminum. Other thicknesses available through special order are .100 and .125 aluminum. Our blanks are 5052H38 or 6061T6 alloy, degreased and etched for paint or reflective sheeting application.

All sizes may be ordered with Non-Reflective, Engineer Grade, Hi-Intensity, or Diamond Grade sheeting professionally applied. Standard blanks have 3/8" holes for mounting and radius corners in accordance with the MUTCD. Non-standard cuts of aluminum are our specialty, please ask your salesperson.

**Note: the first dimension listed is the width of the blank**

EX: A rectangle that is .080x18x24 is .080" thick, 18" wide at the base, and 24" high.
